

Mulk Trading

Metal supply specialists

Aluminium, stainless steel, coated steel, structural sections, mesh, fixings and consumables. Sourced from producers and supplied with technical support and certified documents.

One supplier for the metals you use in fabrication.

Mulk Trading is the trading division of Mulk International. We supply fabrication companies with metal products, technical information and the documents for each order.

Direct from producers

We buy from mills and manufacturers. Each quotation states the producer and country of origin.

Complete range

Sheet, sections, mesh, fixings and consumables on one enquiry.

Technical support

We help you select the grade, temper, finish and coating for the application.

Certified material

Mill certificates to EN 10204 with heat and batch numbers.

Cut and finished to order

Cutting, slitting, perforating, bending and coating before delivery.

Warehousing and logistics

Covered storage for sheet, coil and long products

Consolidation of mixed orders into one shipment

Cantilever racking for sections, tubes and extrusions

Export packing and container loading

Crane and forklift handling for coils and bundles

Delivery to your site or warehouse

Aluminium

Sheet, coil, extrusions and composite panels for façades and general fabrication.

Sheet in alloys 3003, 5005 and 5754 for solid panels. Coil for roll-forming and flashings. Standard and custom extrusions. Supplied in mill finish or with PVDF, FEVE, anodised or powder coating.

Sheet and plate	0.5–6.0 mm, up to 2000 × 4000 mm
Coil	0.2–4.0 mm, slit from 20 mm
Extrusions	6060, 6063, 6005A, 6082 in 6.0 m lengths
Finishes	PVDF, FEVE, anodised, powder coat

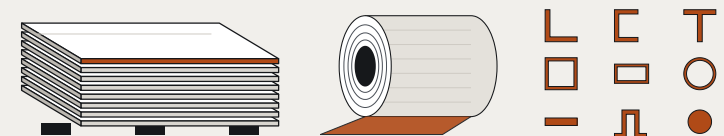

AL-SP

AL-CC

AL-EX

AL-CP

AL-TP

Left to right: sheet and plate, coil, and standard extrusion profiles (angle, channel, tee, tubes, flat bar, top-hat, round bar).

Stainless steel

Sheet, coil and plate in standard and decorative finishes.

Grades 304, 316 and duplex, from 2B to mirror finish. Decorative sheets in PVD colours, hairline, bead-blasted and anti-fingerprint finishes, supplied with protective film.

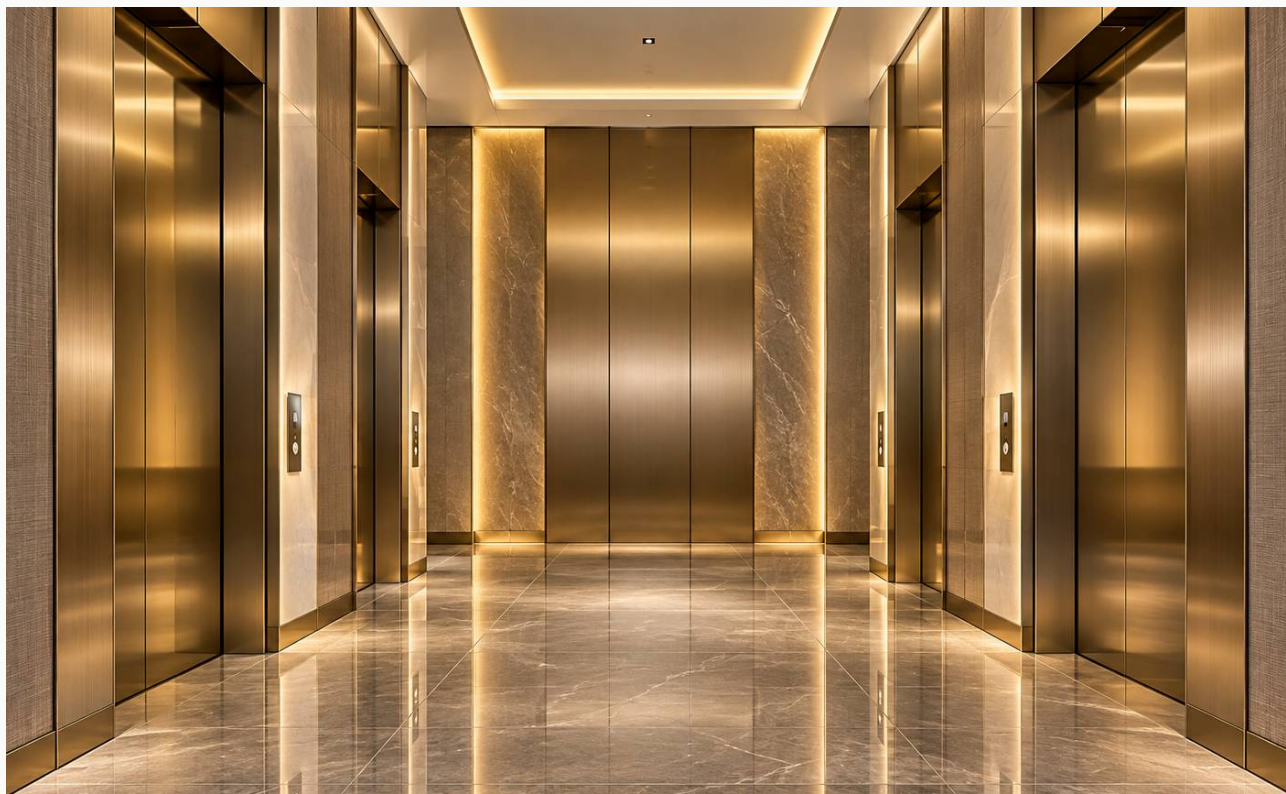

Grades	304, 304L, 316, 316L, 430, 2205
Mill finishes	2B, BA, No.4, hairline, No.8 mirror
Decorative	PVD colours, bead-blasted, embossed, anti-fingerprint
Sheet sizes	Up to 1500 × 3000 mm

SS - SC

SS - DS

Surface finishes, left to right: 1D, 2B, BA, No.4, hairline and No.8 mirror.

Tubes and balustrades

Tubes, bars and fittings for handrails and balustrades.

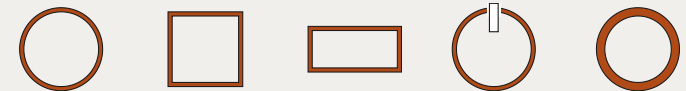

Decorative stainless steel tubes in satin and mirror finishes, pipes for pressure or structural use, bars and angles, and posts, glass clamps and base plates.

Round tube	9.5–219.1 mm OD, ASTM A554
Handrail sizes	42.4, 48.3 and 50.8 mm
Polish	180 to 600 grit
Grades	304 for interiors, 316 for exteriors

SS - TP

SS - BS

SS - BC

Tube sections, left to right: round, square, rectangular, slotted round for glass, heavy-wall pipe.

Coated steel

Galvanised and pre-painted steel coil and sheet, slit to the width you need.

Zinc, zinc-aluminium and zinc-magnesium coatings, electro-galvanised sheet and pre-painted coil in RAL colours. Also hot-rolled, cold-rolled and chequer plate.

Coatings	Z100–Z275, AZ, ZM, electro-galvanised
Paint systems	PE, SMP, HDP, PVDF
Coated thickness	0.3–3.0 mm
Flat steel	Hot-rolled, cold-rolled, pickled, chequer plate

CT-GI

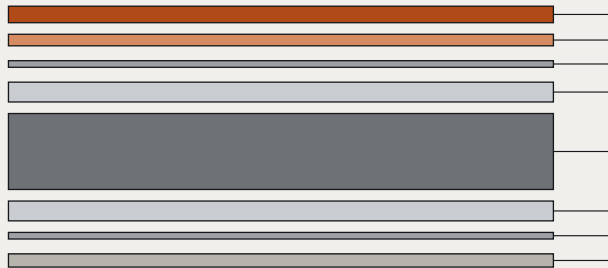

CT-AZ

CT-ZM

CT-PP

CS-HR

CS-CR

Pre-painted steel, top to bottom: topcoat, primer, pretreatment, metallic coating, steel, metallic coating, pretreatment, backcoat.

Structural sections

Hollow and open sections for frames, canopies and support steel.

Square, rectangular and circular hollow sections in black, pre-galvanised or hot-dip galvanised finish. Also angles, channels, beams, flat bars and cold-formed C and Z sections.

Standards	EN 10219, EN 10210, ASTM A500
Grades	S235 to S355, A36, A572
Lengths	6 m standard, 12 m on request
Finish	Black, pre-galvanised, hot-dip galvanised

ST-HS

ST-OS

ST-CF

Open sections, left to right: IPE/UB, HEA/HEB/UC, UPN/PFC, equal angle, unequal angle, flat bar, round and square bar.

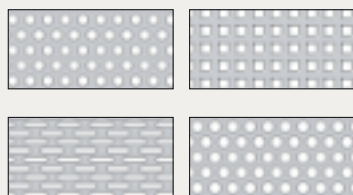

Perforated sheet, mesh and grating

Perforated sheet, expanded metal, wire mesh and steel grating.

Perforated sheet in standard and custom patterns, expanded metal, welded and woven mesh, and galvanised or stainless steel grating, stair treads and trench covers. Used for screens, guards and walkways.

Perforation	Round, square, slot, hexagon, custom
Materials	Aluminium, stainless steel, steel, galvanised steel
Grating	Bearing bars 25 × 3 to 65 × 5 mm
Finish	Powder coat, PVDF, anodised, hot-dip galvanised

MG - PF MG - EX MG - WM MG - GR

Perforation patterns: round 60° staggered, square, slotted and hexagon.

Weathering steel, brass and bronze

Architectural metals with a natural surface that changes with time.

Weathering steel plate and sheet that forms a stable rust-coloured layer, and brass and bronze sheet, bar and extrusions for façades, screens and interiors. We supply samples for colour and surface approval before you order.

Weathering steel	S355J2W (EN 10025-5), ASTM A588
Forms	Plate, sheet, laser-cut and perforated panels
Brass	CuZn37 (CW508L), C27200
Bronze	C38500 architectural extrusions

AM-WS

AM-BR

Architectural metals range, left to right: weathering steel, natural copper, pre-patinated copper, brass, bronze and titanium-zinc.

Copper

Copper sheet, strip and coil for façades, roofs and interiors.

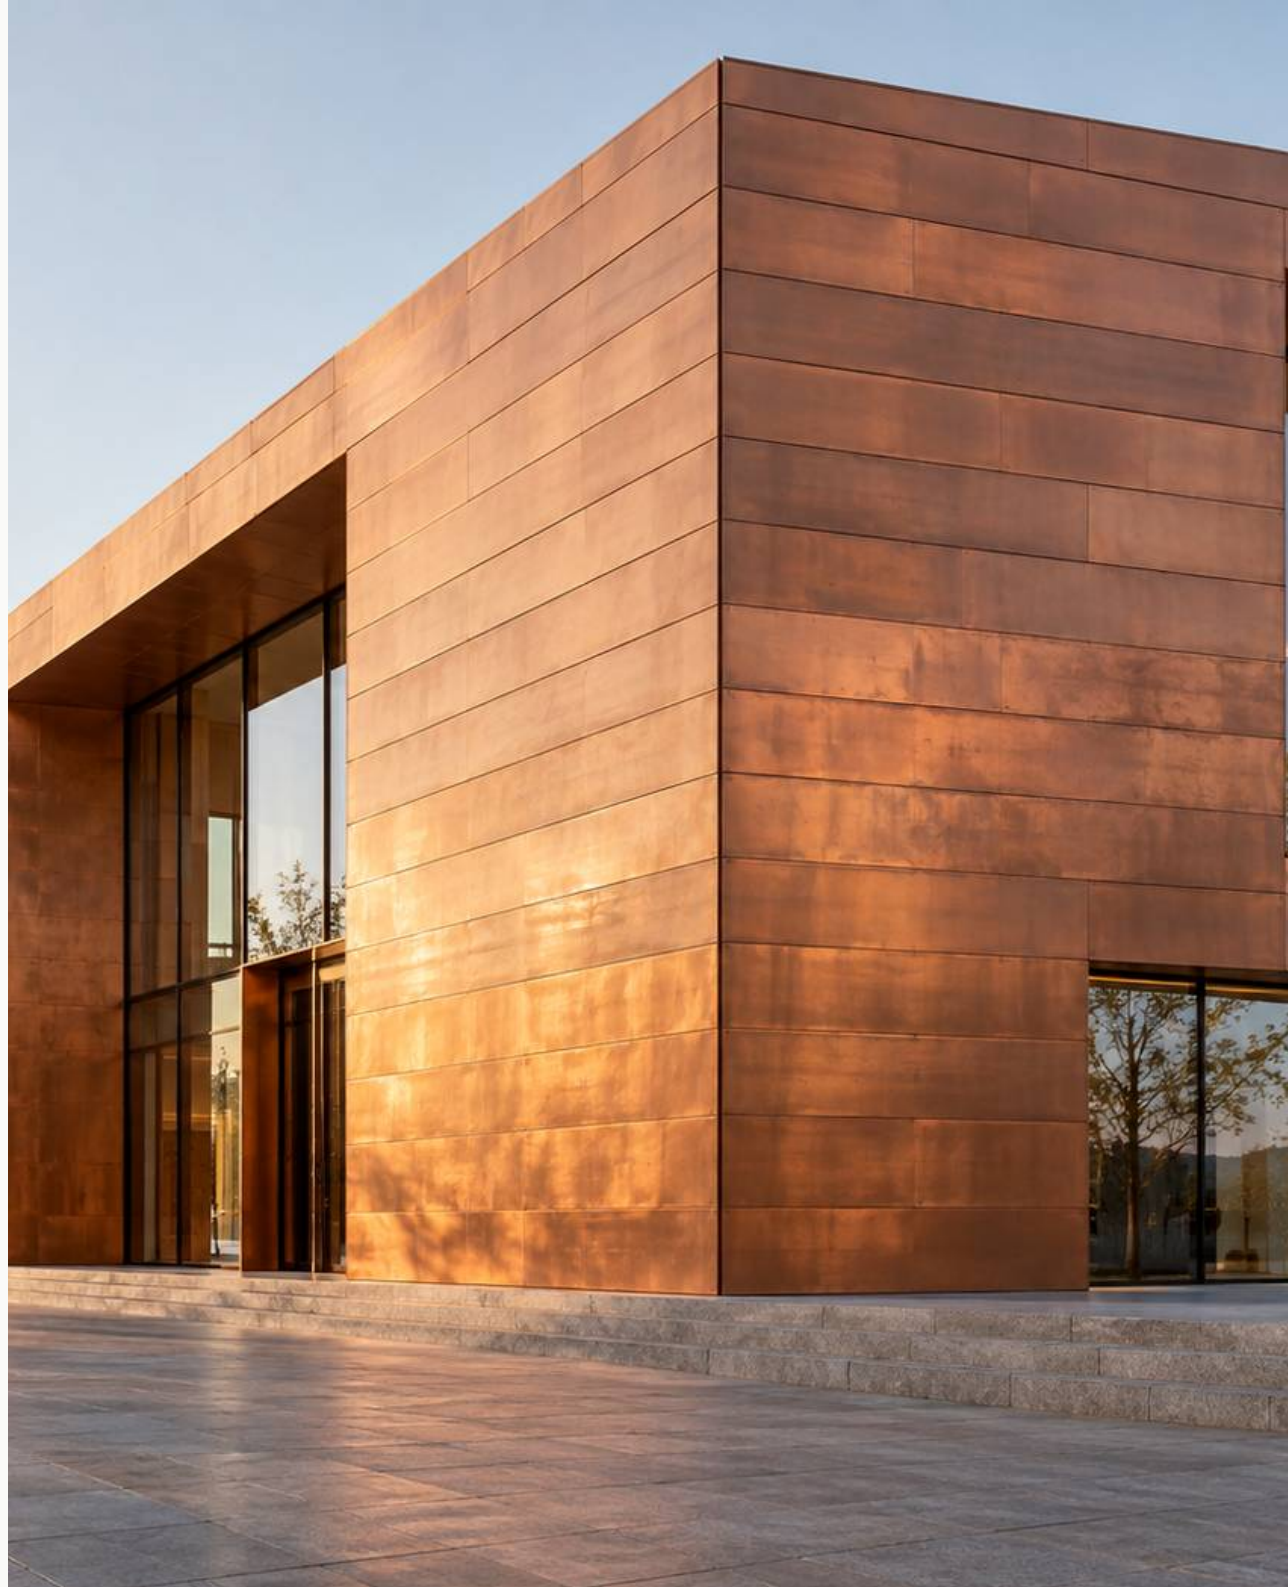

Architectural copper in natural, pre-oxidised and pre-patinated finishes. Supplied as sheet, strip and coil for cladding, roofing, rainwater systems and interior features.

Grade	Cu-DHP (CW024A), C12200
Standards	EN 1172, ASTM B152
Thickness	0.5–3.0 mm
Finishes	Natural, pre-oxidised brown, pre-patinated green

AM - CU

Left to right: natural copper, brown after weathering, pre-oxidised and pre-patinated green.

Zinc

Titanium-zinc coil and sheet for roofing, flashing and rainwater systems.

Natural and pre-weathered titanium-zinc for roof valleys, flashings, ridge and eaves details, standing-seam roofs, gutters and downpipes. Supplied as coil, slit strip and sheet, ready for roll-forming and folding.

Standard	EN 988
Thickness	0.65–1.0 mm
Supply	Coil, slit strip and sheet up to 1000 mm wide
Roofing products	Valleys, flashings, drip edges, ridges, gutters, standing seam

AM-ZN

Finishes, left to right: natural bright, pre-weathered grey and pre-weathered graphite. Natural zinc weathers to a matt blue-grey over time.

Fixings and consumables

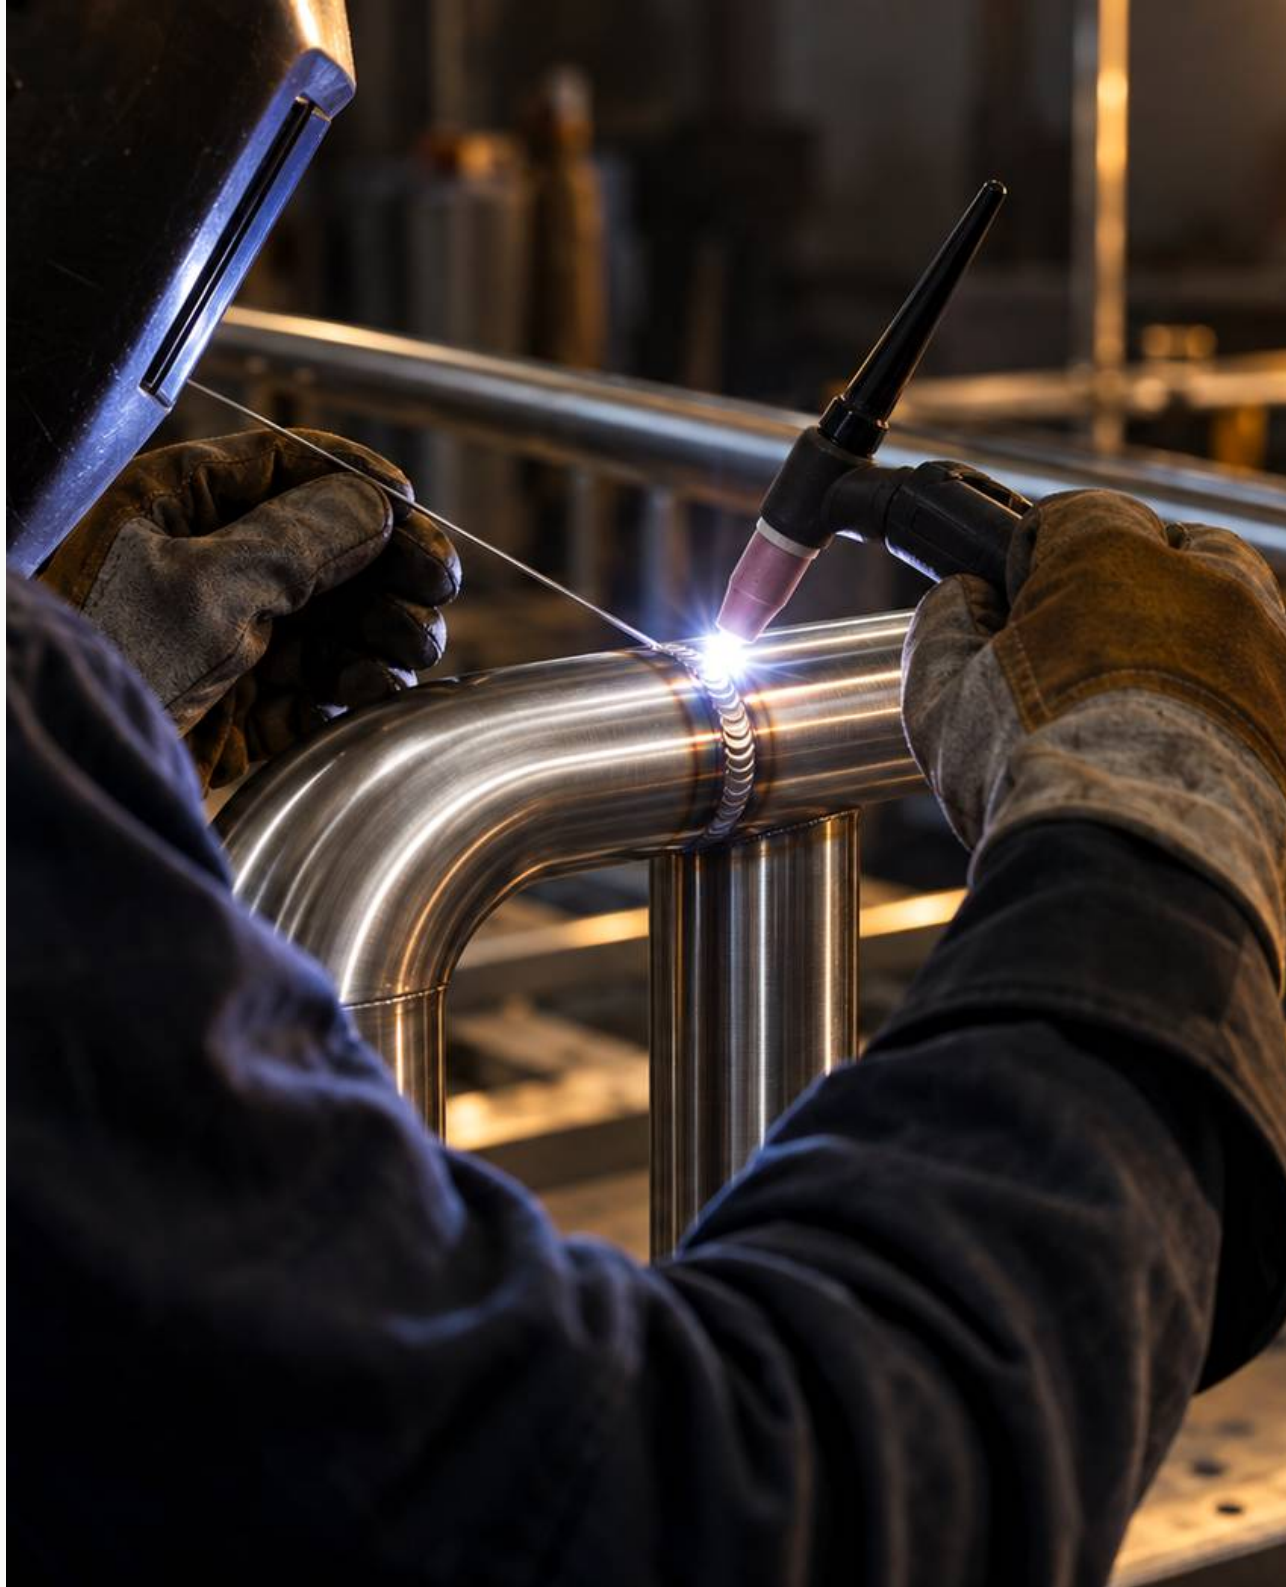

Fasteners, anchors and consumables for each material in this guide.

Stainless steel and galvanised fasteners, rivets, self-drilling screws and anchors. Brackets and profiles for ventilated façades. Welding wire, cutting and grinding discs, and protective film.

Fasteners	A2, A4 and 8.8 hot-dip galvanised
Anchors	Mechanical and chemical, ETA-assessed
Welding wire	ER4043, ER5356, ER308L, ER316L, ER70S-6
Abrasives	Cutting, flap and non-woven discs

[FX-FS](#)[FX-AN](#)[FX-RS](#)[FX-SB](#)[CN](#)

Left to right: bolt, nut, washer, blind rivet, self-drilling screw and wedge anchor.

Processing

Material cut and finished to your requirements.

We arrange cutting, slitting, perforating, bending, coating and galvanising with our processing partners. We confirm availability, tolerances and delivery time for each enquiry.

Cutting to length

Slitting

Shearing and sawing

Laser and plasma cutting

CNC punching and perforating

Bending and folding

Powder and PVDF coating

Hot-dip galvanising

Working with us

From enquiry to delivery in four steps.

- 1 Send your enquiry**
Include the product code, grade, size, finish, quantity and delivery location.
- 2 We check the specification**
We check the grade, finish, coating and certificates against your project specification.
- 3 You receive a quotation**
The quotation states the producer, country of origin, delivery time and Incoterm.
- 4 Delivery with documents**
Material arrives with mill certificates to EN 10204. Heat and batch numbers match the material.
